

Future Career Plan

Thinking deeply about something will help you make good decisions about the subjects you should consider studying next year.

Name:

In which subjects am I experiencing success?

Which subjects give me the most personal satisfaction and enjoyment?

If you could think of a job you would like to do when you finish school, what would that be?

How much do you know about that job/occupation? Current and future job prospects in South Australia/Australia?

What would you have to do to be able to work in that job or that industry?

If that job requires you to go to University or TAFE, what are the prerequisites for getting into that University Course? Check the SATAC guide.

Which subjects are necessary for me to achieve my goals?

Am I keeping my options open so that I can change my mind about what I want to do in the future?

Which subjects will help me to develop skills in areas that interest me and to use my leisure time in a more productive way?

Am I considering attending an interstate university? Should I consider English as a Stage 2 subject to meet interstate entrance requirements?

Do I want to go to University? Which University are you considering?

What courses are you considering?

Have you checked out the SATAC guide? (online)

What was the cut off score for the course or courses you are looking at doing?

Do you wish to get an Apprenticeship? Have you considered Flexible Pathways (FIP) this includes School Based Apprenticeship and Vocational Education and Training (VET)?

NOW have another look at the Senior School Course Handbook

REALLY IMPORTANT INFORMATION

You cannot make a good decision about subject selection if you don't know what is involved in each subject. It's really important that you refer the Senior School Course Handbook and read the detailed information, especially the assessment part, about any subjects that you are considering. The Course Handbook can be located on the school website under the curriculum tab, Senior School. There is also a link to Flexible Pathways that includes an overview of School Based Apprenticeships (SBNA) and Vocational Educational Training (VET), but this is also covered in more detail in Handbook.

If you are considering a subject next year that you are currently doing but are not meeting a C grade or better, now is the time to address this. Your teachers will be making recommendations into subjects based on your application to the course this year.
